

Correlation between cores GS20 and GS19.
Four tie-points identified based on %CaCO₃, data plotted v depth (cm).
GS20 age-depth model then applied to those points in GS19 to produce GS19 age-depth model

intcal20; R-250yr			
GS20		GS19	
depth cm	cal BP	depth cm	cal BP
400	8622	450	8622
560	11516	650	11516
590	12090	700	12090
800	13525	915	13525
